

Jhansi Yeoj Gatus

IT Support Specialist | Service Desk, End-User & Desktop Support

Pampanga, Philippines · +63 953 054 1704 · jhansiyeojgatus10@gmail.com · linkedin.com/in/jhansigatus · github.com/eazyboytt · jhansi-yeoj.vercel.app

PROFESSIONAL SUMMARY

IT Support Specialist supporting a multi-site outsourcing operation as the first point of contact for Windows, Microsoft 365, and network issues. Owns the full ServiceNow ticket lifecycle — triage, assignment, escalation, and verified resolution — plus user onboarding and offboarding, Azure account and access administration, VPN/RDP remote access, and endpoint troubleshooting for on-site and remote staff. Automated IMAP-to-Exchange Online mailbox migrations with PowerShell and documents recurring fixes so the same ticket does not come back.

TECHNICAL SKILLS

Service Desk & End-User Support: ServiceNow ticket lifecycle, triage & SLA tracking · Windows 10/11 troubleshooting · hardware, software & network diagnostics · printers & peripherals · remote desktop support · documentation

Identity & Access Management: Azure / Entra user accounts · password resets · provisioning & deprovisioning · access control · onshore IT coordination

Microsoft 365 & Email Support: Exchange Online · Outlook troubleshooting · OneDrive · Teams · mailbox migrations (IMAP → Exchange Online) · cPanel mail, DNS & hosting

Endpoint & Remote Access: VPN (OpenVPN, GlobalProtect, .ovpn profiles) · RDP · OS imaging, drivers & installers · device setup & pre-configuration · remote-work enablement

Network Support & Security: LAN/WAN · TCP/IP · VLANs · DNS · routers, switches & access points · wireless · Omada SDN (WAN failover, QoS) · AdGuard DNS web filtering

Automation & Tools: PowerShell · batch scripting · task automation · Excel/CSV reporting · TeamLogger · Teams, Zoom, Webex

PROFESSIONAL STRENGTHS

Clear communication with non-technical users · patient end-user coaching · ticket ownership through to resolution · documentation discipline · calm triage during outages

PROFESSIONAL EXPERIENCE

IT Support

Dec 2024 – Present

PRTNA Outsourcing Corporation (StrataStaff) · Pampanga, Philippines

Multi-site outsourcing operation supporting on-site and remote staff

Tools: ServiceNow · Microsoft 365 / Exchange Online · Azure · Windows 10/11 · PowerShell · OpenVPN · GlobalProtect · RDP · TP-Link Omada SDN · AdGuard DNS · cPanel · Teams / Zoom / Webex

- First point of contact for on-site and remote staff across multiple sites — resolving hardware, software, Windows 10/11, Microsoft 365, Outlook, VPN, and connectivity issues from intake through to a verified fix.
- Own the ServiceNow queue end to end — daily triage, assignment, and status discipline across Open / Processing / Awaiting / Hold — keeping SLAs visible and reporting queue health to management.
- Administer Azure user accounts, password resets, access changes, and DNS records, coordinating access requests with the client's onshore IT team.

- Support the Microsoft 365 rollout and post-cutover period — provisioning mailboxes and OneDrive, remediating access issues, and repairing broken file links after mailbox moves.
- Automated IMAP-to-Exchange Online mailbox migrations with PowerShell, replacing manual per-mailbox moves with repeatable batch scripts that cut manual effort and cutover errors.
- Onboard and offboard users end to end — Windows device setup, Microsoft 365 and Outlook sign-in, VPN/RDP access via packaged OpenVPN and GlobalProtect profiles, and security policy briefing.
- Maintain network and endpoint hygiene with AdGuard DNS web filtering and TP-Link Omada SDN administration (VLANs, wireless, WAN failover, QoS), and document recurring fixes into reusable guides that cut repeat how-to requests.

SELECTED PROJECTS

IMAP → Exchange Online Migration Automation — PowerShell · Exchange Online · IMAP

- **Problem:** Manual per-mailbox IMAP migrations slowed the Microsoft 365 rollout and invited cutover errors.
- **Action:** Engineered reusable PowerShell scripts for batch mailbox moves with pre- and post-migration validation.
- **Outcome:** Reduced manual migration effort and cutover errors across the rollout.

M365 Migration & Access Remediation — Exchange Online · OneDrive · Teams

- **Problem:** Post-cutover access issues and broken file links disrupted user productivity.
- **Action:** Ran structured mailbox and OneDrive access remediation and file-link repair during the migration window.
- **Outcome:** Reduced follow-up tickets by streamlining mailbox and OneDrive access requests.
